

Find who's actually building on Robinhood Chain.

See what projects shipped this week, with proof. Free,
and no wallet needed.

Thousands of tokens. Almost no way to tell who is really building.

1.35M

token and project records on
Robinhood Chain

4,674

real projects with evidence
behind them

A team shipping every week and a dead token look the same on a price chart.

HEY Research Lab answers three questions.

01

Who is still building?

Every project gets a plain status:
Shipping, Active, Quiet, Dormant, or
Unknown.

02

What did they ship?

Releases, code, contracts and
announcements, each with a link to
the proof.

03

Who is nobody watching yet?

Projects that ship a lot and get little
attention. We call it the Discovery
Gap.

Open HEY Research Lab. See who shipped this week.

heyresearch.xyz

Find who's actually building on Robinhood Chain.

Projects, builders and recent ships across RH / 4663.

Q Search project, ticker or contract

Holding a contract address? [See who built it](#) — HEY reads the chain for it, even one it has never seen before.

HOW THESE ARE COUNTED

HEYRESEARCH.XYZ

04 / 18

Every project tells its builder story first.

Status and last ship

In one line, before any number.

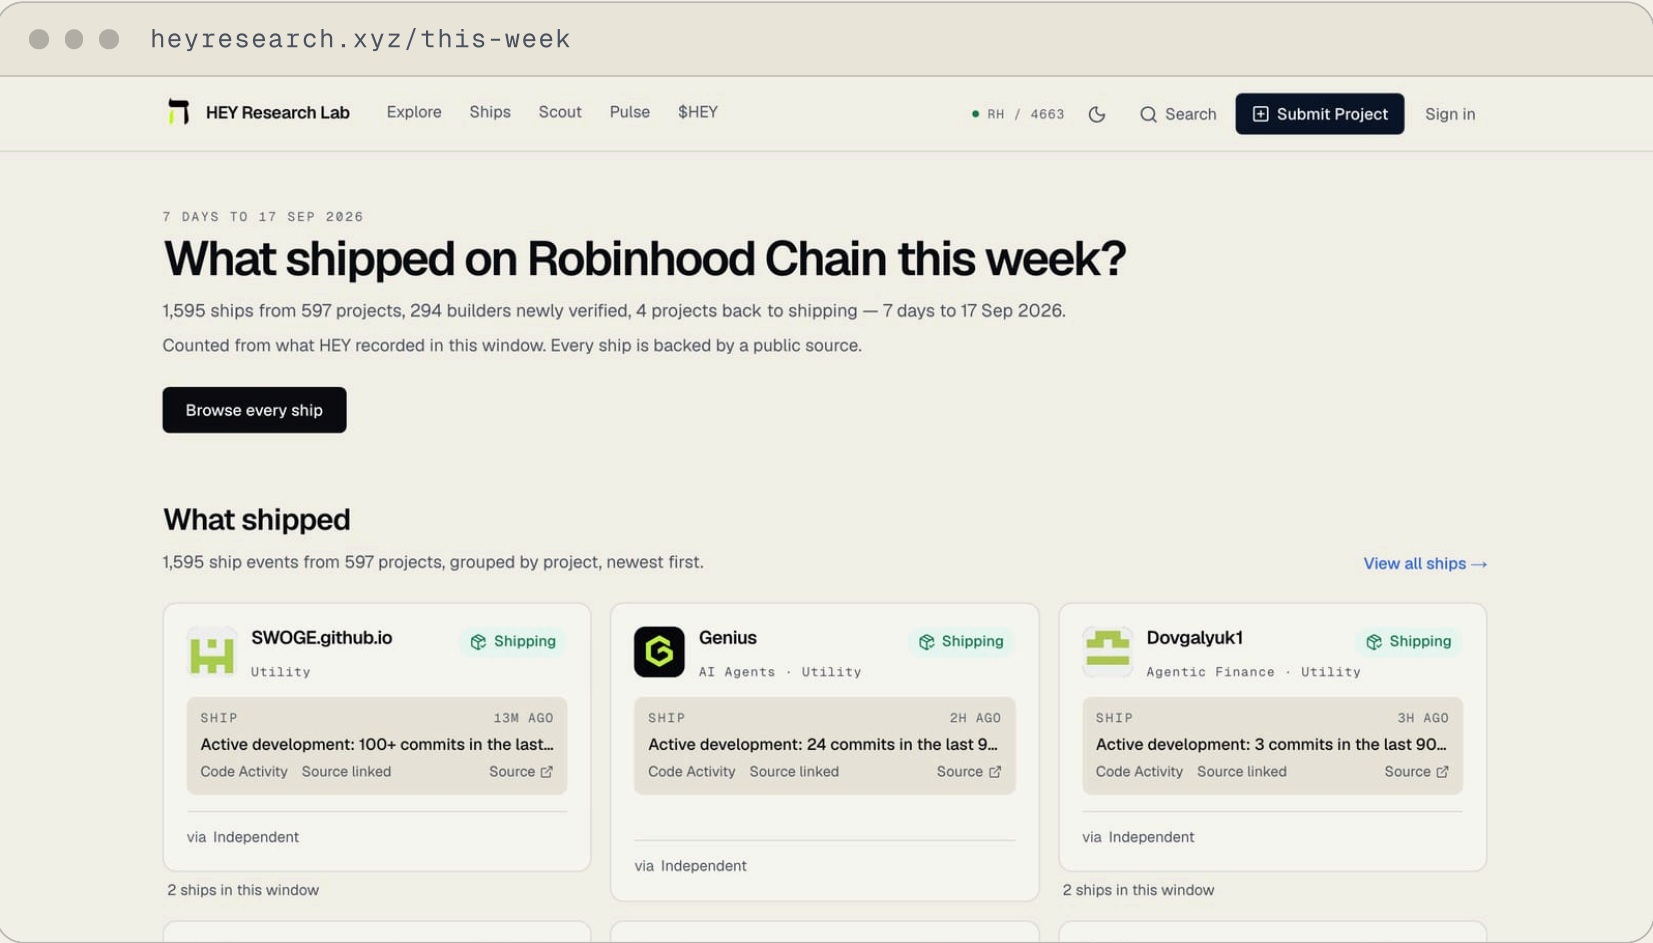

The newest ship, with proof

One click to the source.

Twelve weeks of activity

Real work, week by week.

One page every week: what shipped.

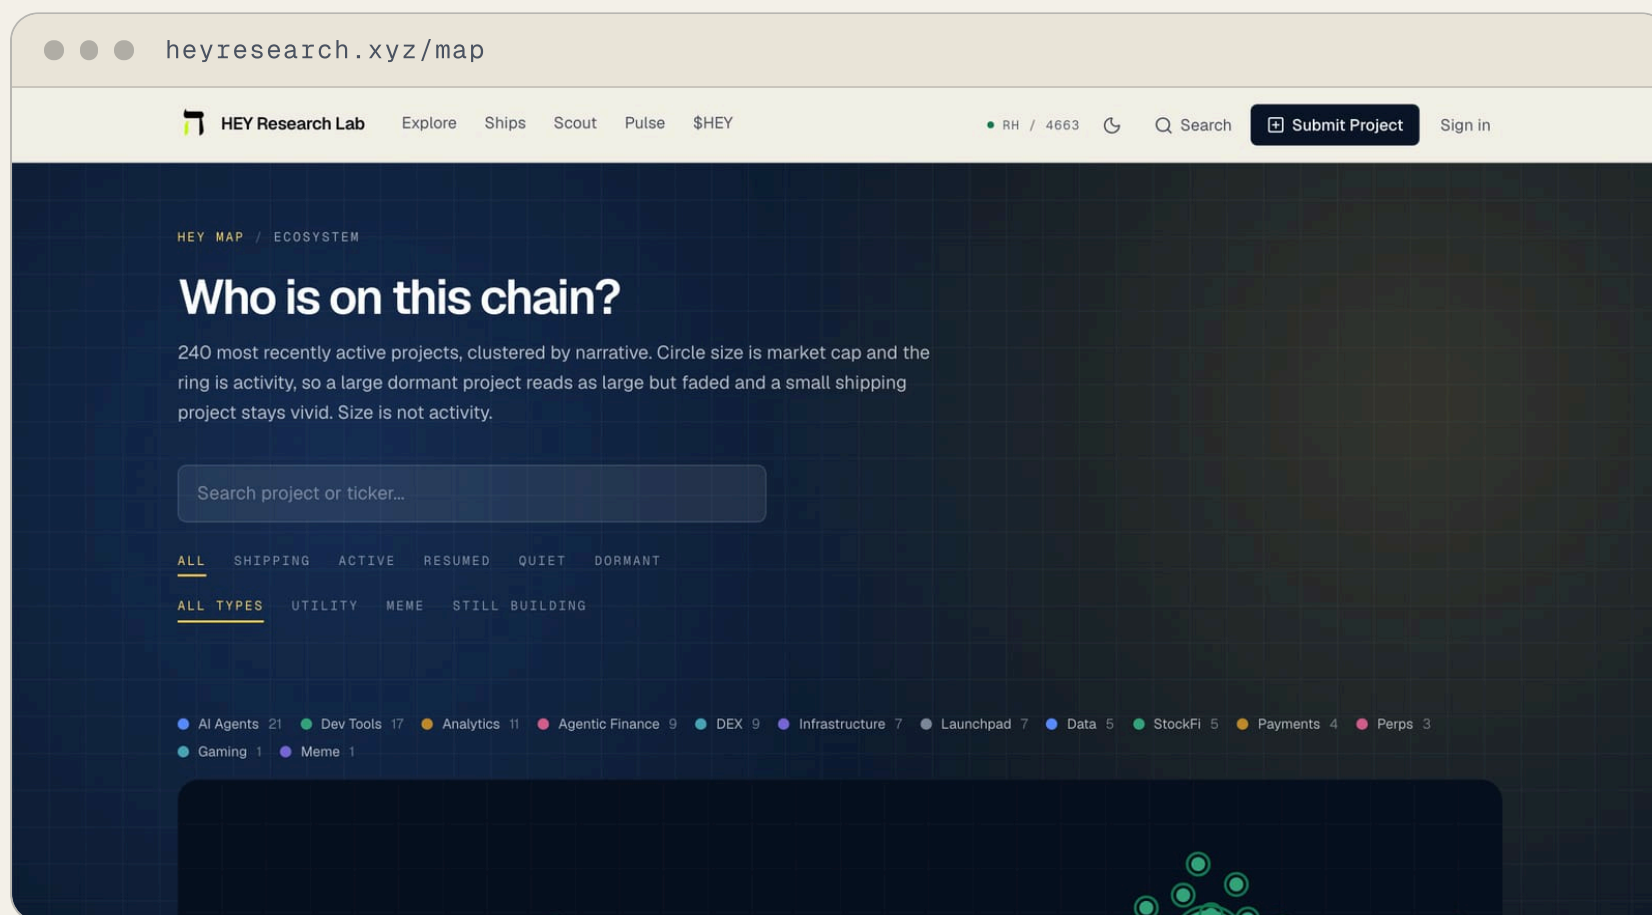

1,596 ships

with proof, in the seven days to 17 September.

Every ship has a source

Self-reported and verified never look the same.

The whole chain, clustered by what people build.

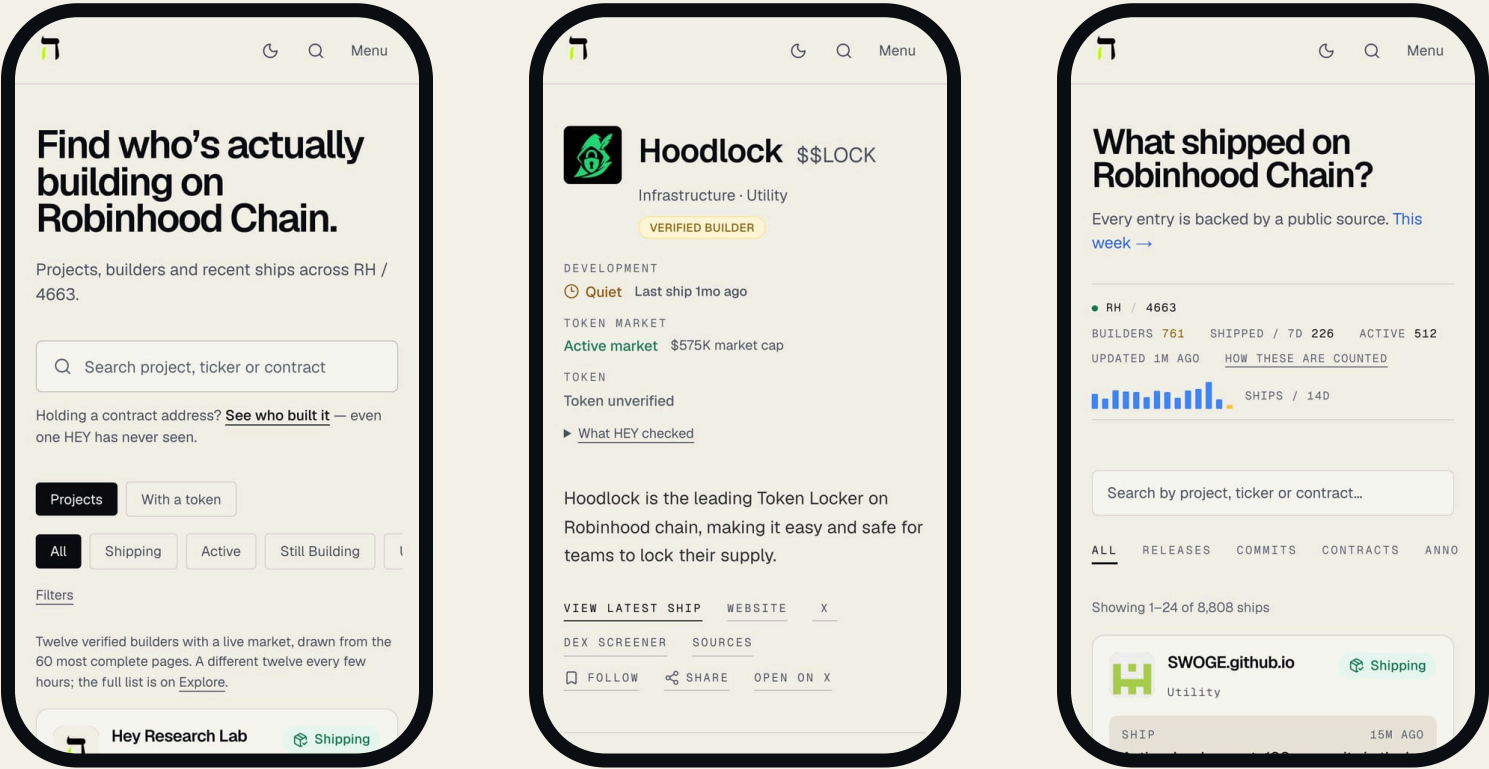

Big circle, big market cap

Bright ring, still shipping. Size is not activity.

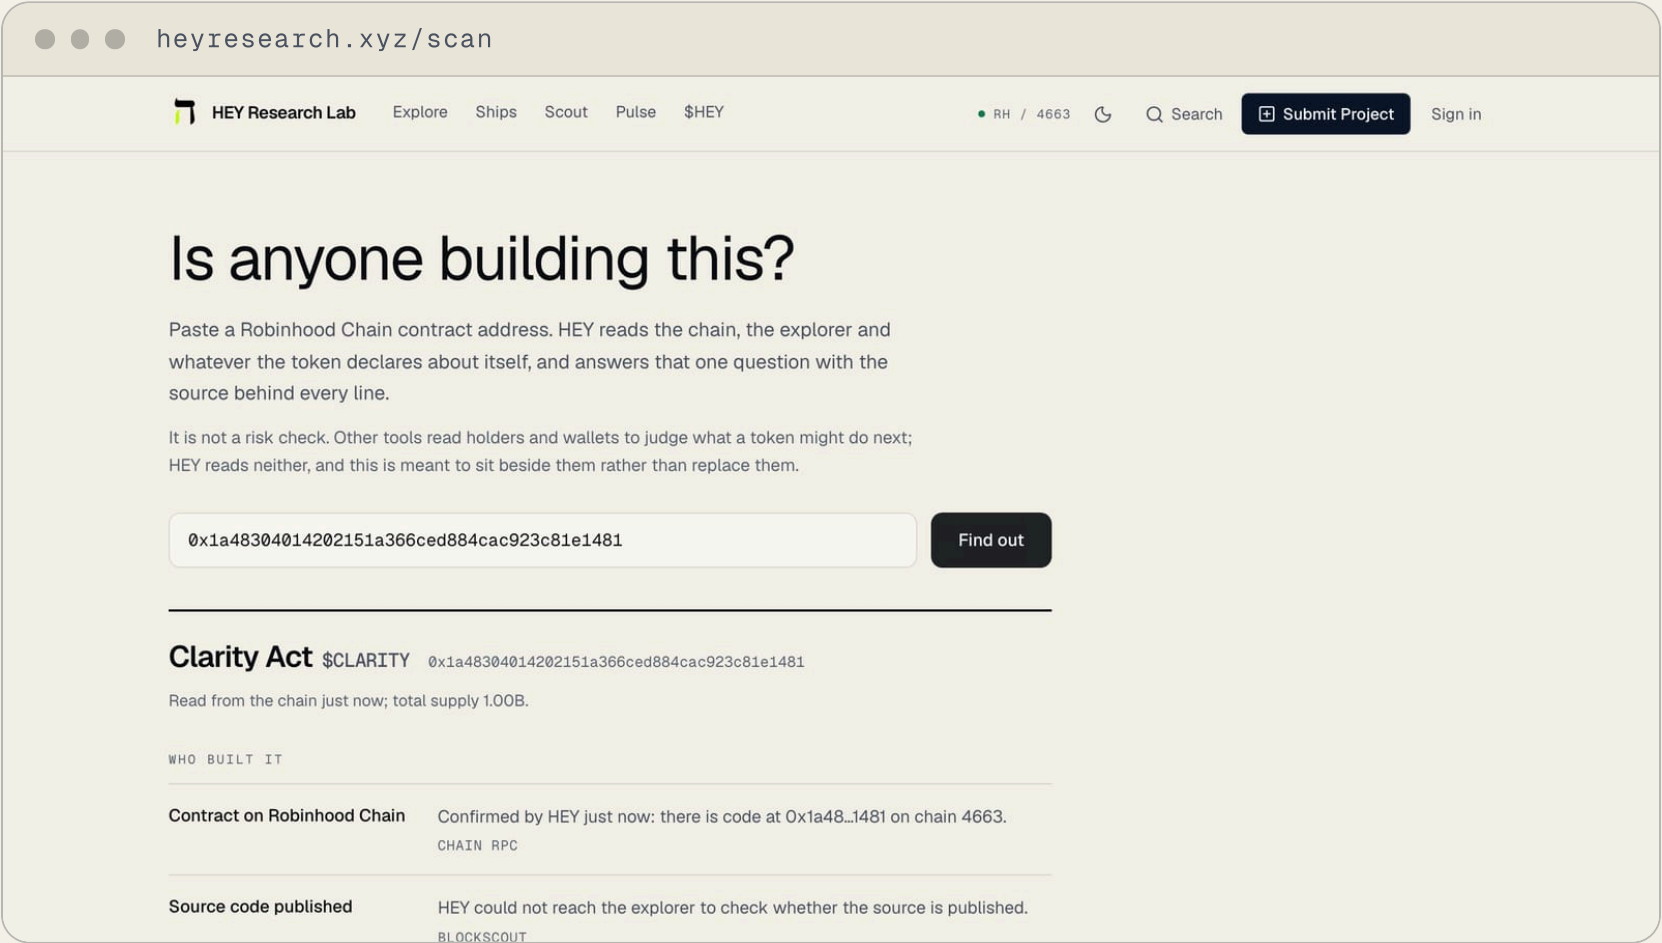

23 narratives

AI agents, StockFi, infrastructure, memes, DEX, launchpads and more.

Works on your phone. No wallet, no sign-up.

Paste any contract. Ask if anyone is building it.

A different question

Other scanners ask whether a token will rug. This one asks whether anyone is building it.

Answers in seconds

Even for an address HEY Research Lab has never seen before.

No score. No verdict.

Facts, each with the source it came from. What it could not check, it says so.

Live, on real data, every hour.

4,674

projects on HEY Research Lab

8,809

ships with proof

1,596

ships in the last 7 days

1,480

verified builders

All numbers from HEY Research Lab's own database on 17 September 2026, after two corrections that day: a publication-gate fix returned 7,957 evidence-less pages to indexed status, and 3,243 restated code-activity summaries were collapsed into one ship per repository per week. Market cap is shown for context, never used to rank.

Show us what you're building

Add your project to HEY. Give us one thing we can check — a contract on Robinhood Chain, a public repository or a live website. We review every submission before it appears, and you can claim the profile afterwards to post updates.

Submission bond (optional)

≈ \$1 · 5,900 HEY, held by the treasury while the submission is reviewed and returned when it is approved or declined for an ordinary reason. It is kept only after a moderator finds spam, impersonation or a false claim, with the reason recorded.

Claim Hoodlock

Prove you control this project's domain, repository or token contract, then you can post updates and keep the profile accurate.

How would you like to verify?

☒ **DNS TXT record**
Add a record to the project's domain.

☐ **File or meta tag on your website**
Publish `/.well-known/hey-research.txt`, or a `<meta name="hey-research-verification">` tag on your homepage.

☐ **Wallet signature**
Sign a short message with the account that launched, owns or deployed `0xd5bf...4b94`. A signature only — no transaction, no funds.

[Sign in with GitHub to continue](#)

Prove you own the project with your website, DNS, GitHub or a wallet signature. Post updates; HEY Research Lab verifies them. Free, always.

Same data, any way you want it.

PUBLIC API

JSON, no key needed

Projects, ships and search. Every answer carries its source. Hold \$HEY for a key with a bigger allowance.

FEEDS

RSS and weekly

New ships as they land, and the week in one feed.

MCP

Ask your AI

Plug HEY Research Lab into Claude or any assistant and ask who is building.

What HEY Research Lab never does.

- 01 Track wallets or holders.
- 02 Rank by price.
- 03 Sell a ranking. Paid slots are labelled, always.
- 04 Guess. If HEY Research Lab cannot prove it, it says "unknown".

Paid surfaces are labelled. Rankings are never for sale.

FREE

Featured by HEY Research Lab

The team's picks on the home page.
Cannot be bought.

PAID · LIVE NOW

Sponsored slots

Two labelled slots on the home page, 3 or 7 days, paid on chain and verified before they start. In \$HEY after launch. Never affects rankings.

BUILT · OPENS WITH \$HEY

Research requests

Ask HEY Research Lab to look at a project sooner. Buys a place in the queue, not a result.

A token for research, not for rank.

Pay for research and placements

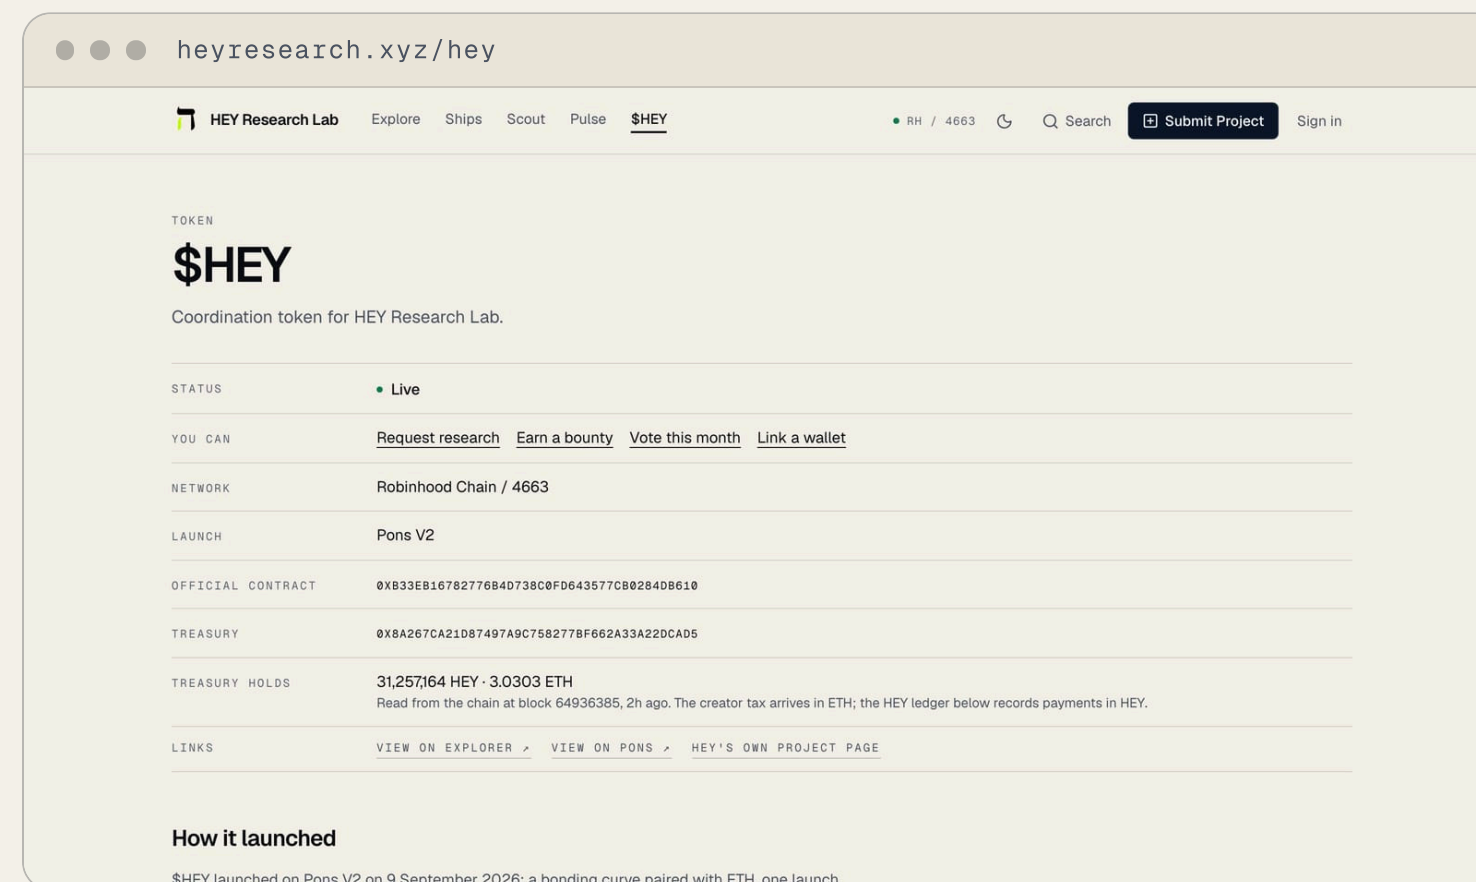

Priced in \$HEY, lower for people who hold it.

Earn bounties for evidence work

Half at approval, half after ninety days if the evidence still stands.

Holding \$HEY never changes a ranking

It launched on 10 September 2026. Holding it still changes nothing about who ranks where.

Eight reasons to hold \$HEY. None of them is price.

- 01 **Lower prices.** Research and placements cost less if you hold \$HEY.
- 02 **Earn bounties.** Verify a release or trace a migration; paid from the treasury.
- 03 **Back a claim.** A bond behind a bounty claim or an update, returned when it checks out.
- 04 **A bigger API allowance.** The same public data, more of it each month.
- 05 **Read research first.** New notes open to holders before everyone else.
- 06 **Vote on research money.** Once a month, where the research third goes. Advisory.
- 07 **One wallet, linked once.** A signature; every payment and payout uses it.
- 08 **A ledger, every month.** Every \$HEY that moves is a line with its transaction.

Sell, and each of these goes away. That is the whole reason to hold. Nothing here promises a price.

Builders, get seen. Ecosystems, find your builders.

Builders

Claim your project and embed the HEY Research Lab badge on your site.

Ecosystem teams

Show your builders with proof instead of hype.

Researchers and agents

Use the API, the feeds and MCP. Tell us where we are wrong.

Public data, one accent colour, no dashboards. Built for the people who build.

Not a **buy signal.**

Who is still building, what they shipped, and who nobody is watching yet. That is the whole product.
